

## Mississippi 811, Inc. Membership Information

The fee structure is set by the board of directors each year. The following are some statements of general knowledge about Mississippi 811, Inc.:

1. The utility owner/operator must furnish and maintain an automated method of receiving the line location information by Email or FAX. After-hours emergency contact information must also be provided. The methods used must be accessible 24-hours a day.
2. The utility owner/operator will be responsible for supplying Mississippi 811, Inc., the database (service areas in which buried lines or facilities exist) and for keeping the database updated (additions/deletions). Membership cannot be activated until database has been submitted. The database will be used by the Mississippi 811, Inc. computer system to determine if a member is to be sent a locate request message. In order for us to build your service area you will need to provide us with a digital copy (ArcView, AutoCAD, etc.), GPS readings or a paper map that has been marked to show all roads and/or areas where you have buried facilities. The service area is then created by putting a minimum 400-ft. buffer around the area you have provided as your underground lines. Please understand that there will be times when you will receive a locate message from the call center where excavation is taking place within 300 ft. of your service area. This is due to the fact that our system has a built-in 300 ft. buffer around our excavation marking tools. This has been built into the system as a precaution, due to possible inaccuracies in the map or an excavator supplying incorrect driving directions. However, if you feel that you have received a locate request that does not meet this scenario, please notify our mapping department. An annual update of each operator's underground utility lines or underground facilities is mandatory.
3. Membership Fees: Annual billing is in November. This billing is based on actual tickets received from November 1 of the prior year to October 31 of the current year. (I.e., if the fee structure is \$1.60 per message, a member that received 250 messages in a given year would then be billed \$400.00.) For the 2009 billing period, the current rate per ticket is **\$1.51**.
4. Beginning about midnight each night, the Mississippi 811, Inc. computer system will send your company what we call an "Audit" or "Good Morning Report". This report is sent as a double check regarding your locate request messages because it lists the locate request number of each locate request that was sent to you the day before. You will need to check and make sure that you **did receive** all messages that were sent to you. If you did not receive a particular message, then you may notify us that you need it re-transmitted. This report will take place regardless of whether you did or did not receive any messages for the day before.
5. "Working day" shall mean a twenty-four-hour period commencing from the time of receipt by Mississippi 811, Inc., of the notification in accordance with the law, excluding Saturdays, Sundays and legal holidays. Upon receiving a locate request from Mississippi 811, Inc., you will be required, by law, to mark your underground facilities that are in the excavation area, indicated on the ticket, using stakes, paint, or other clearly identifiable materials. This is to show the field location of underground facilities in accordance with the current color code standard of the American Public Works Association. You may also uncover or expose the underground facilities so that the excavator may readily see their location. Some situations may require pointing out to the excavator of certain aboveground facilities such as, but not limited to, manhole covers, valve boxes, pipe risers and cable risers, which indicate the location of underground facilities. Markings must be accurate in one of three ways: (a) within eighteen (18) inches measured horizontally from both of the outside edges of an operator's facility; (b) a strip of land eighteen (18) inches either side of the operator's field mark; or (c)

mark the width of the facility or line plus eighteen (18) inches on each side of the marked width of the facility or line. The markings provided by operators shall only be valid for a period of ten (10) working days from the proposed starting date provided to the nonmember operator(s) or Mississippi 811, Inc.

6. Every person owning or operating underground utility lines or underground facilities shall, upon receiving advance notice of the commencement of excavation, make an investigation within two (2) working days from the time notice is provided to determine the approximate location of its underground utility lines and underground facilities in the area of the proposed excavation. All owners or operators shall either: (a) mark the approximate location of underground utility lines and underground facilities in or near the area of the excavation, so as to enable the person engaged in excavation work to locate the lines and facilities in advance of and during the excavation work; or (b) advise in writing or by telephone or electronic means that it has no underground utility lines or underground facilities in the excavation area. In lieu of such marking, the operator may request to be present at the site upon commencement of the excavation, so long as the operator complies within two (2) working days of the receipt of the notice. When an excavator, upon arriving at an excavation site, sees evidence of unmarked underground utility lines or underground facilities or encounters an unmarked underground utility line or underground facility on an excavation site after excavation has commenced, where notice of intent has been made, that excavator must immediately contact Mississippi 811, Inc. All operator(s) thus notified must contact the excavator within four (4) hours and inform the excavator of any of their known underground facilities, active or abandoned, at the site of excavation.

7. Your company is not a member of Mississippi 811, Inc. until the enclosed application and setup forms are completed and returned, database has been submitted and your company has approved the completed service area. Once we have built your service area, we will send you a copy of the service area along with a database agreement to sign. Once we receive your signed database agreement, we will activate your membership and call your company by telephone to confirm the activation and to verify that you have received a test ticket.

8. If your company chooses to receive locate requests by email, you will need to complete the enclosed "Authorization to Transmit Information by Email" form.

We have attempted to address questions that you might have regarding the fee structure, the one-call center operation and your membership responsibilities. However, please feel free to call Jessica McInnis or Fred Johnson at 601-362-4322 or Amanda Russell or Donna Germany at 601-368-1150 should you need additional information or if we can be of help in any way. We look forward to having you as a member of the Mississippi 811, Inc.

**[NOTE:** You might ask yourself one question - "How much does it cost to repair one break?]

**A complete copy of the Mississippi Excavation Law can be downloaded from our web site at [www.ms1call.org](http://www.ms1call.org)**

## Membership Application and Agreement

WHEREAS, Mississippi 811, Inc., (the Corporation), a Mississippi non-profit corporation, has been formed in an effort to reduce damage to underground facilities of its members and to establish a statewide notification center (the "Notification Center");

WHEREAS, the undersigned represents that it has underground facilities located within the state of Mississippi and is otherwise eligible to be a Member of the Corporation; and

WHEREAS, the undersigned requests to be a Member of the Corporation and hereby tenders with this application the fee as specified by the Board of Directors of the Corporation.

NOW, THEREFORE, the undersigned hereby applies for admission as a Member of the Corporation and in connection therewith covenants and agrees when accepted as a Member, and it's assigns, as follows:

1. To not share, sell or disseminate the One-Call ticket information with any other entity in any form or fashion.
2. To abide by and comply with such rules and regulations as the Board of Directors may adopt, from time to time, for utilization of the statewide Notification Center by members.
3. To abide by and comply with the By-Laws of the Corporation;
4. To pay promptly the fees prescribed by the Board of Directors of the Corporation.

## INSTRUCTIONS FOR MEMBER SET-UP FORM

1. COMPANY NAME – Owner/Operator of underground facilities.
2. ADDRESS – Mailing address where mail will be sent regarding the One-Call Center.
3. PHYSICAL ADDRESS (Mississippi Office) – Physical address of the field office located in Mississippi. (If different than mailing address.)
4. MEMBER TYPE – ENTER WHICH BEST DESCRIBES YOUR COMPANY FROM THE FOLLOWING LIST:  
Phone, Electric, Gas Distribution, Gas Transmission, Sewer, Water (City/Town), Rural Water, Crude Product, Cable TV, Other
5. CONTACT PERSON – Contact information for the person handling locate requests.
6. MODE OF RECEIVING TICKETS - By what means do you want your locates and daily audit report sent to you. You may choose more than one mode of receiving. **\*\*Note - If you choose to receive by fax and your fax machine is located in your home, you may want to choose another fax number or an email address to receive the audit report by. The report is sent between 1 and 3 A.M. and may wake you if your fax is near a bedroom.\*\***

**\*\*The TEXT MESSAGING option was created to aid companies that are operating with only one or two people. We are aware that those operators are often busy in the field and may not know that they have received an emergency locate by email, fax, etc. If you choose to use the text message option the text message will only contain partial emergency locate information so you will be required to choose fax, email or FTP as your normal mode of receiving locates. If you choose Text Messaging you will be sent an agreement that must be signed and returned to us before we can send your emergency locates by text message.\*\***

**\*\*If EMAIL ticket receiving will be your primary method please provide a fax number as a backup in case email servers go down. If you choose email you will be sent an email agreement that must be signed and returned to us before we can send your locates by email.\*\***

**\*\*If you plan to use a CONTRACT LOCATING SERVICE, list the name and contact information for that company and we will contact them for their ticket delivery information.\*\***

7. DATA BASE CONTACT PERSON - Contact information for the person handling the record keeping for the location of your underground facilities and keeping us updated with any additions or deletions to your underground facilities.
8. AFTER HOURS EMERGENCY CONTACT INFORMATION – Enter after hours contact information.
9. SPATIAL DATABASE BUFFER SIZE – This is the size buffer that will be used around your facilities. The minimum that we will accept is 400 ft.
10. Please list all counties in which your company has underground lines.
11. If you do not have GPS Readings or a digital copy of your underground facilities and need maps to draw your service areas, we will gladly supply them for you.

The following are different ways your company can submit your database:

**Paper Maps** - You may use a paper county or city map to highlight your underground facility locations. Please highlight all of the roads for the entire length that your underground facilities run. If you have underground facilities covering an entire city, outline the entire city limits and any roads that run into the county you have underground running along. If you do not have or cannot get a map, we can provide you with the county maps needed. Just indicate so on the enclosed "Member Set-Up form".

**GPS Readings** - A list of GPS readings for your underground facilities can be used to build your spatial database. To keep a safe level of accuracy, readings should be taken approximately 500 feet apart. Reading should also be taken in areas where your underground facilities change direction. If you have a cross-country line, readings should also be taken at every road crossing. These GPS readings can be submitted as an excel file, word file, etc. You can also submit your exported waypoint files.

**Your Computerized Map** - We can accept any type of digital mapping files (Example: ArcGIS, AutoCAD, etc.) that contain the location of your underground facilities. If you are using Intergraph please export those files into a **dxg** file (AutoCAD file) before sending them to us. You must provide us with your data projection/coordinate system information, for example: State Plane NAD83, WGS84, etc.

**If you have questions about submitting your database feel free to contact our GIS department at (601) 368-1150 or by email at [gis@ms1call.org](mailto:gis@ms1call.org).**

# *Announcement of Free KorWeb Services*

*Press Release January 2009*

Mississippi 811, Inc. and KorTerra, Inc. are pleased to announce the beginning of a partnership to provide extra value to the One Call members. Mississippi 811, Inc. and KorTerra are teaming up to provide KorWeb, KorTerra's web based One Call Ticket Management software, as a no cost benefit of being a member of Mississippi 811, Inc. This partnership allows Mississippi 811, Inc., to elevate the level of service they provide to their membership while also enhancing their daily operations. KorWeb, in addition to other innovative ideas being placed into operation, continues to elevate the Mississippi One Call System as a leader in the industry. It is not mandatory that members use this service; it is only an option.

"Providing KorWeb to the membership at will provide the members with the latest technology to receive and manage their one-call ticket information" said Sam Johnson Executive Director of Mississippi 811, Inc. "It will also provide an easy way to respond to the Positive Response System that will be deployed in Mississippi. The PRS will enable all the stakeholders, including excavators, to retrieve the latest information concerning their one-call requests."

Some of the key advantages of offering KorWeb to the Mississippi One Call members are:

- Improved communications with excavators and provide an automated system to respond to all tickets.
- Provide members with an automated and easy method to store details of the work performed on each ticket.
- Ability to customize each members system to meet their needs and increase their efficiency.
- A member has access to industry leading ticket management software to accurately and efficiently manage their locate tickets.
- Promote Safety and Damage Prevention using features such as Emergency Notification.
- Ensures accurate and timely member compliance with positive response requirements.
- **No Cost to the Member** to implement and use!

"One of the concerns in Mississippi was to provide their members with an easy to use Positive Response System" said Chris Stendal, KorTerra President. "KorWeb will do this in such a way as to make it effortless for the members to respond to the new system. KorWeb also provides advanced technology and ticket management capabilities that will benefit all of one call members in the state and make excavation safer."

Some of the key technologies available in the KorWeb service include:

- Integrated mapping technology.
- Positive response management (voice, email, fax)
- 24x7x365 emergency notification services.
- Mobile software for the locators in the field.
- Advanced mapping/screening capabilities.
- Reliable communications technology.
- Host software in our tier-3 data center.
- 24x7x365 system monitoring.
- and many more.

KorWeb is the most comprehensive one call ticket management software application in the industry and is entirely web-based. Therefore, no software is installed on the client computer; all that is needed is an Internet browser. Mississippi One Call members can access their one-call tickets via KorWeb anywhere, anytime they can access the Internet. There is no setup, or ongoing maintenance and support fees. Setup is simple and KorTerra takes care of the whole process for the member, so they can receive their locate tickets in KorWeb within 24 hours.

If you would like to receive your locate tickets through KorWeb, please indicate so by checking **KORWEB** under "Mode of Receiving Locates" on the enclosed "Membership Setup Form". If you have any questions about KorWeb, please contact Amanda Russell at (601) 368-1150 or [gis@ms1call.org](mailto:gis@ms1call.org). You may also sign up for a demo of KorWeb on the Mississippi 811, Inc. web site at [www.ms1call.org](http://www.ms1call.org).
